COMMENTS ON THE ABSTRACT UNDER PCT RULE 38.2(b)

Applicant respectfully requests the International Searching Authority to substitute the attached abstract for that attached to the International Search Report bearing a mailing date of 03 January 2005.

The attached abstract includes the following changes:

at line 4 after "300" add --, 336--;

at line 7 replace "302" with --308-- and add --at least partially-- before "constructed".

Favorable action is hereby requested.

Respectfully submitted,

James H. Morris

Abstract

Embodiments of the invention relate to electrophysiology catheters and methods of using the same. According to one embodiment, the catheter (300, 336) includes a
5 braided conductive member (28) at its distal end that can be radially expanded, for example using a mandrel (306) slidably disposed within a shaft (304) of the catheter. According to another embodiment, the catheter comprises a tip portion (338) at least partially constructed of an elastomeric material. According to a further embodiment, the catheter includes a braided conductive member wherein a thermocouple is formed
10 using one filament of the braided conductive member and one thermocouple wire. Other embodiments of the invention relate to a handle for use with a catheter and methods of using the same.
